6 North Park Drive, Suite 105
Hunt Valley, MD 21030

Dear Jeff,

Thank you for the opportunity to evaluate your product, Acti-Plex, as an admix to our pebble and quartz pool surfaces in Southeast Florida.

Magulick's Pool Company started including Acti-Plex in our mixes in August, 2012. Prior to Acti-Plex, scale and "mottling" issues required inordinate service calls to ensure proper water balance during the initial cure of the pool surface.

Acti-Plex has significantly reduced the gray color variations commonly called "mottling". In fact, one section of a pool did exhibit this phenomenon when the plasterer forgot to add Acti-Plex to a batch. We now have greater confidence in delivering the high standards of service that our customers expect.

The plaster crew has noted the improved pumpability, uniformity, workability, and ease of aggregate exposure.

Again, thank you for an excellent product.

Yours Very Truly,

Dan Magulick
